

GRP Overdoor Canopy Measuring Guide

- A Measure the width of the structural opening (brick to brick)
- B Add a minimum of 100mm per side to allow for a standard overhang (min. 200mm) **or**
- C Add a minimum of 200mm per side if brackets or decorative legs are required (min. 400mm)
- D Canopy without Brackets = A + B **or** Canopy with Brackets = A + C

- E Check for any height restrictions - such as pipes, lighting, vents and any steps in the brickwork.
- F Choose your canopy from the Overdoor Canopy page, select the closest size available, ensuring it is suitable for your purpose.
- G Check all dimensions from the relevant Canopy Specification sheet.
- H If in doubt, please ask!
You can email digital photos to us with dimensions and we will make a recommendation for you.
